

MagSaver Kit

Maximise your Fluid Value!

We can help you!

Wogaard Coolant Saving Solutions and Eclipse Magnetic Filtration Systems work together for a greener and more productive Manufacturing Industry

Our Advantage

This is what happens when you combine the Coolant Saver with High performance Magnetic Filtration.

1. Saving up to 50% of Coolant and Oil while cleaning it at the same time.*
2. Minimal Disposal costs - up to 90% less coolant disposal costs and easy recyclable ferrous particles.*
3. Longer Lasting Fluids - Extend Fluid life by x10 by removing fine particle ferrous contamination.*
4. NO Consumables - Nothing else needed to ensure effective coolant's recirculation and filtration.
5. 24/7 Operation - Once the coolant pump is on, the kit will be collecting and cleaning coolant from the swarf bin.
6. Minimal Running Costs - No external power is needed.
7. Fit and Forget - No moving parts that need to be replaced in short periods of time.
8. Health & Safety - Cleaner fluids minimise the risk of health and safety issues through exposure to contamination.
9. Protecting the Environment - Minimises waste and fluid disposal, contributes to ISO14001.

To deliver the above benefits, we've created a Kit for you!

MagSaver Kit

✓ **MagSaver Kit includes:**

MM10 MM5

- Compact Magnetic Filter with high collection capacity

COOLANT SAVER

- Automatically Reclaiming coolant which is dragged out into the swarf bin from the conveyor while the machine is in operation.

This is a great example of installation of the MagSaver Kit that is currently cleaning and recycling soluble oil at Renishaw's facilities.
